

MAF :: ENSG00000261722 · T2

Long-read-only candidate · chr16:79585880 to chr16:79212901 (GRCh38)

LONG-READ ONLY · UNRESOLVED, NOT A CONFIRMED STRUCTURAL VARIANT

DNA

NOT DETECTED

No matched DNA breakend pair supports this junction.

SHORT-READ RNA

NOT DETECTED

No Isofox match despite an available matched short-read sample.

SHORT-READ + ASSEMBLY

NOT ASSESSED

No short-read junction call was available for transcript reconstruction.

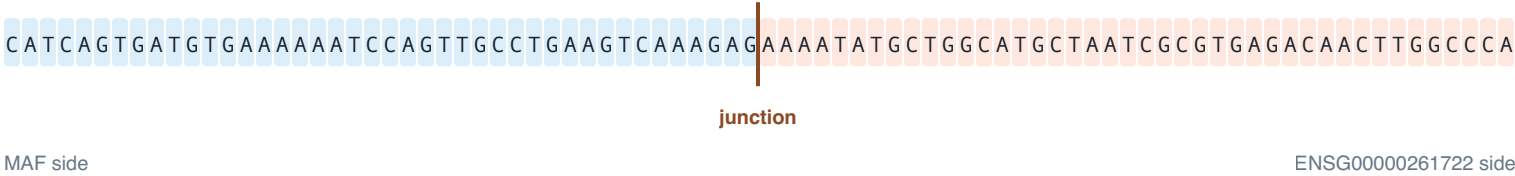

LONG-READ RNA

DETECTED

CTAT-LR-Fusion reports 31 T2 ONT reads with a non-reference splice.

1 · OBSERVED OR INFERRED JUNCTION SEQUENCE

MAF to ENSG00000261722

2 · PROTEIN-LEVEL INTERPRETATION

PROTEIN WITHHELD

Without orthogonal DNA or short-read support, no fusion ORF is asserted from the long-read call alone.

SCIENTIFIC INTERPRETATION

Long-read support can reveal candidates, but without orthogonal support this remains compatible with RNA artifact.
