

TPST1 :: CRCP · T2

Matched-sample long-read rescue · chr7:66205522 to chr7:66127704 (GRCh38)

LONG-READ RESCUE · DNA POSITIVE, MATCHED SHORT-READ CALL NEGATIVE

DNA

DETECTED

PASS duplication pair; 10 variant fragments and 0.057 tumor allele fraction.

SHORT-READ RNA

NOT DETECTED

No Isofox match in the matched T2 short-read RNA callset.

SHORT-READ + ASSEMBLY

NOT ASSESSED

No short-read fusion call was available to seed a transcript assembly.

LONG-READ RNA

DETECTED

CTAT-LR-Fusion reports 22 ONT reads spanning the reference-splice junction.

2 · PROTEIN-LEVEL INTERPRETATION

PROTEIN WITHHELD

Long reads establish the expressed junction, but the catalog does not provide a validated coding frame.

SCIENTIFIC INTERPRETATION

At T2, long reads recover an expressed DNA-supported junction missed by the matched short-read caller.
